Summary

B.Tech Computer Science student (2026 Batch) specializing in full-stack engineering and AI integration. Proven experience building responsive MERN applications, optimizing databases, and deploying machine learning APIs to engineer scalable software systems.

Technical Skills

Languages: Java, JavaScript, Python, Solidity
Frontend: React.js, Vite, HTML5, CSS3, Bootstrap
Backend: Node.js, Express.js, Flask, JDBC
Databases: MySQL, MongoDB
AI / Data: OpenAI API, Gemini API, Scikit-Learn, Pandas, NumPy, Tableau, Data Preprocessing
Core Concepts: OOP, DBMS, Operating Systems, SDLC, Data Structures & Algorithms
Developer Tools: Git, GitHub, VS Code, Render, Ganache, Socket.io

Projects

Todo Pro – Full Stack Task Management System

Live Project Link

Technologies: React.js, Node.js, Express.js, MongoDB

- Engineered a full-stack task platform with shared workspaces and client-side routing pipelines.
- Implemented dynamic room configuration adjustments utilizing unified React State management workflows.
- Built an automated priority sorting system via custom frontend string parsing to organize user tasks.

FinShield AI – Financial Fraud Detection Platform

Major Project

Technologies: React.js, Node.js, Express.js, MongoDB, Python, Flask, Scikit-Learn, Socket.io

- Built a full-stack fraud platform featuring a microservices architecture and a 4-tier Role-Based Access Control system.
- Developed a Python/Flask ML ensemble model (Isolation Forest, Random Forest) achieving 92.35% accuracy on 15K samples.
- Integrated Socket.io pipelines to push real-time fraud risk alerts and live financial transaction updates to dashboards.

AgriTech AI – Smart Farming Solution

Finalist, RupaJna Hackathon 2026

Technologies: Python, Google Gemini API, Data Preprocessing

- Developed a computer vision workflow utilizing morphological transforms and thresholding to detect plant leaf anomalies.
- Structured asynchronous API pipelines feeding localized geographical features to Google Gemini to automate crop advice.

Budget Buddy – Finance Management System

Academic Project

Technologies: Java, JDBC, MySQL, OOP

- Authored a personal finance application executing runtime polymorphism and base class inheritance.
- Integrated a MySQL database via JDBC to manage user authentication and automate balance calculations.

Blockchain Integrated AI Health Records

Mini Project

Technologies: Solidity, Ganache, Python, Flask, Scikit-Learn, MongoDB, SHA-256

- Engineered a secure health pipeline writing SHA-256 data hashes onto a local Ganache blockchain.
- Integrated a Scikit-Learn diagnostic model into a Flask transaction runner to process patient data.

Education

Anurag University

2022 – 2026

B.Tech in Computer Science Engineering

CGPA: 8.56/10

Sri Chaitanya Junior College

2020 – 2022

Intermediate (MPC)

87.6%

Sri Chaitanya Techno School

2020

Secondary School Certificate (SSC)

GPA: 9.8/10

Certifications

- Data Analyst Skill Path: Excel, SQL & Python – Udemy Certification
- Microsoft AI Odyssey Challenge Badge – Microsoft

Leadership & Achievements

- Vice President, ACM Student Chapter** – Coordinated technical events, conducted an industrial visit, managed committees, and hosted programming bootcamps to boost engagement.
- Finalist, National Level Prototype Challenge (RupaJna 2026)** – Presented a functioning data-driven AgriTech system to an engineering panel at RVR & JC College, addressing real-world multi-crop yield optimizations.
- Finalist, TechXcelerate Hackathon** – Co-engineered a database-driven functional product prototype in an intensive, collaborative 24-hour development cycle.
